### (54) CONTROL SYSTEM

#### (57)Abstract:

PROBLEM TO BE SOLVED: To provide a control system that can realize desired control operations, with simpler operations.

SOLUTION: A remote controller 28 has function keys whose control contents can freely be registered. A system control circuit 32 instructs a menu generating circuit 36, to generate a menu according to an operation of the remote controller 28, the menu generating circuit 36 references a menu image storage device 34 in accordance with the instruction, to generate a multi-layered menu image. A display control circuit 38 superimposes the menu image from the circuit 36 on an image stored in an image memory 26 and applies the resulting image to a display device 40. A registration menu is displayed below the lowermost layer. A function key of a registration destination is selected and decided on the registration menu, and items selected by the menu so far are registered as functions of the corresponding function key.

# **LEGAL STATUS**

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
